

What is claimed is:

1. A method of selling replacement parts for a product over a computer network, comprising:

providing a plurality of product manufacturer selection options for a customer to select

5 from;

receiving a manufacturer selection of one of the product manufacturers;

providing a plurality of product selections for the customer to select from;

receiving a product selection of one of the products;

providing a schematic illustrating a plurality of component parts of the product with

10 associated reference identifiers;

receiving a selection of at least one of the component parts.

2. The method of claim 1 further comprising providing a description of the component part selected, including at least one name for the component part and at least one part

15 number for the component part.

3. The method of claim 2 wherein the product is a firearm product.

4. The method of claim 1 wherein the reference identifier is a selectable reference numeral.

20

5. The method of claim 1 wherein the schematic is an exploded view.

6. The method of claim 1 further comprising receiving an order for the component part from the customer.

25

7. The method of claim 1 wherein the description includes more than one name associated with the component part.

8. A method of selling replacement gun parts over a computer network, comprising: providing a plurality of gun manufacturer selection options for a customer to select from;

30

receiving a manufacturer selection of one of the gun manufacturers;
providing a plurality of gun product selection options for the customer to select from;
receiving a product selection of one of the gun products;
providing a schematic illustrating a plurality of component parts of the gun product with
5 associated reference identifiers;
receiving a selection of at least one of the component parts.

9. The method of claim 8 further comprising providing a description of the component
part selected, including at least one name for the component part and at least one part
10 number for the component part.

10. The method of claim 9 further comprising providing an indication that the
component is a restricted component.

15 11. The method of claim 8 further comprising authorizing ordering of the restricted
component.

12. The method of claim 9 further comprising receiving an order for the component
part from the customer.

20 13. The method of claim 9 wherein the description includes more than one name
associated with the component part.

14. The method of claim 9 wherein the at least one part number of the description
25 includes at least one manufacturer part number.

15. The method of claim 9 wherein the part number of the description includes more
than one manufacturer part number.

30 16. The method of claim 9 wherein the reference identifier is a selectable reference
numeral.

17. The method of claim 9 wherein the schematic is an exploded view of the gun product.

5 18. The method of claim 9 wherein the reference identifiers are ordered by alphabetical ordering of corresponding names of the component parts.

19. A method of ordering parts for a gun, comprising:

visiting a web site associated with a gun supplier;

10 identifying a physical gun part to be replaced, said physical gun part not including an identifying part number, the gun having a known manufacturer and a known model number;

selecting the known manufacturer from the web site;

selecting the known model number from the web site;

15 receiving from the web site a schematic of the gun;

comparing the physical gun part to be replaced to the schematic of the gun;

matching the physical gun part with a gun part illustrated within the schematic;

selecting a link on the schematic to receive an associated description of the selected gun part;

20 selecting a link to initiate an ordering process to order a replacement gun part matching the associated description and matching the physical gun part.
